

The GEMINI Series

MultiSIM Punching & Separation

GEMINI GSM-124

MultiSIM Punching Machine

- SIM Punch
- Single Sim Punch
- DualSim Punch
- Dual Electrical Cutting Heads
- Card Orientation Error Detection

Output: 7000 Cards/Hr

Voltage: 220VAC 50/60Hz

Power: 2.6kW

Compressed Air: 6kg/cm² 110 L/min

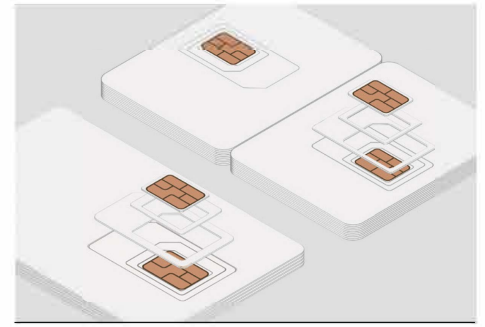

GEMINI GSM-7000

SIM Punching Station

GEMINI GSM-7000

SIM Scoring Station

GEMINI GSM-7000

Single & Dual Sim Card

The GEMINI Series features flexible configurations for single or multiSIM production while still maintaining the precise tolerances and high throughput needed.

The GEMINI GSM-7000 sets the standard for value, speed, and reliability. It is perfect for companies looking to enter the market or add capacity.

Optional customized tooling is reasonably priced and designed for quick changeovers from one SIM plug configuration to the next.

Punch Stations: Four Mitsubishi electrical punch stations drive dual cutting heads to ensure a cleanly cut SIM plug with precise scoring cuts for an easy release.

Capable of producing single, double and quad SIM plug cards in a wide array of shapes and sizes.

GSM-7000 is efficiently designed for small footprint that delivers high output.
